**How many people get breast cancer?**

- Every year more than 55,000 people are diagnosed with breast cancer in the UK (that’s the equivalent of **150 people every day or one person every 10 minutes**).
- Every year around 42,000 people are diagnosed with breast cancer in England (that’s the equivalent of more than 100 people a day). This is predicted to rise to 49,743 new cases in 2020.
- Every year around 4,500 people are diagnosed with breast cancer in Scotland.
- Every year around 2,600 people are diagnosed with breast cancer in Wales.
- Every year around 1,300 people are diagnosed with breast cancer in Northern Ireland.
- There are around 36,000 people with secondary breast cancer in the UK.

**How common is breast cancer?**

- Breast cancer is the **most common cancer in the UK** (around a third of all new cancers diagnosed in women in the UK are breast cancer).
- 1 in 8 women in the UK will develop breast cancer in their lifetime.
- 1 in 900 men in the UK will develop breast cancer in their lifetime.

**Who gets breast cancer?**

- Risk increases with age — eight out of 10 breast cancers are diagnosed in women aged 50 and over.
- Around 10,000 women are diagnosed with breast cancer under the age of 50 every year in the UK.
- Men get breast cancer too — every year around **350 men** are diagnosed in the UK.

**Breast cancer operations**

- Just over **80%** of people diagnosed with breast cancer in the UK have surgery.
- Just under half (43%) of women who have surgery for breast cancer have a mastectomy just over half (57%) have breast-conserving surgery.
- Among women having a mastectomy for breast cancer in the UK around 21% have an immediate breast reconstruction.

**How many people die from breast cancer?**

- Every year around **11,700 women** die from breast cancer in the UK (that’s the equivalent of 32 women every day).
- Every year around 75 men die from breast cancer in the UK.
- Breast cancer is the second most common cause of death from cancer in women (after lung cancer).
- Since the 1980s, breast cancer death rates have fallen by more than a third.
Breast cancer – the numbers...

How many people survive breast cancer?  

• More people survive breast cancer than ever before.
• More than **eight out of 10 (86%) people survive breast cancer beyond five years.**
• More than three quarters (78%) of people survive it beyond 10 years.
• Almost two out of three (65%) people survive it beyond 20 years.
• The earlier the stage at which breast cancer is diagnosed, the better the chances of survival.
• More than half a million people (570,000) are alive in the UK after a diagnosis of breast cancer. This is predicted to rise to 840,000 in 2020.
